Dear Mr. Torres

I am writing you today to voice my opposition to the proposed toxic waste injection wells in the old Conroe Oil Fields in Montgomery County.

The disposal of toxic waste poses a great threat to the community. Should any form of malfunction of these wells occur, 3 major aquifers stand to be contaminated. These 3 aquifers supply water to all or part of 54 surrounding counties in Texas.

I urge you to please consider the potential danger these wells pose to one of the fastest growing communities in Texas and do everything within your power to stop this catastrophe in the making. In addition to the major health risks, think about the economic impact this could have on the community as well.
